NARRATIVE REPORT ON THE PURCHASE OF SCHOOL GENERATOR

The Generator Fund was formally turned over by the previous GPTA Officers (2023–2024) to the School Principal. Following this, the fund was handed over to the current GPTA Officers on January 20, 2026, at the principal's office.

Afterwards, the decision to purchase a school generator was made. The order was placed on January 28, 2026, with the verbal approval of both the Board of Trustees Chairperson and the School Principal. The generator was procured from Toolbox Hardware, Dangwa Commercial Center, Km 6, La Trinidad, Benguet, and was successfully hauled on February 4, 2026.

The purchased generator is a 12kVA BRAVUS brand silent type diesel generator with an Automatic Transfer Switch (ATS) amounting to ninety-five thousand pesos (P95,000.00). This initiative reflects the collaborative effort of the GPTA and school administration to enhance the school's facilities and ensure continuous power supply for the benefit of the school community.
