NARRATIVE REPORT ON THE PURCHASE OF SKULL GUARDS

To enhance the safety and preparedness of ECALTI learners and personnel during emergencies, the ECALTI General PTA Officers purchased skull guards to be used during earthquake and other emergency drills. These protective head gears aim to minimize the risk of head injuries and promote a safer environment during disaster preparedness activities.

A total of 455 skull guards were procured at a total cost of ₱45,045.00, with 1 additional skull guard donated by the ECALTI General PTA Officers, bringing the total to 456 pieces. The skulls guards were distributed according to grade level and personnel for easier identification during drills. This includes 87 green skull guards for preschool learners, 145 blue skull guards for Grades 1 and 2, 93 orange skull guards for Grades 3 and 4, 102 red skull guards for Grades 5 and 6, and 29 white skull guards for faculty and staff.

The skull guards were officially turned over to the school on March 4, 2026 for proper distribution and use during earthquake drills and other emergency preparedness activities.

This initiative demonstrates the strong support of the ECALTI General PTA Officers in promoting disaster preparedness and ensuring the safety of learners and school personnel during emergency situations.
